Education

2021 - 2025

Taras Shevchenko National
University of Kyiv
Faculty of Information Technologies
Bachelor's Degree

Skills

- Python
- Ml, Dl (Pandas, Scikitlearn, Matplotlib, Seaborn, Numpy, Tensorflow, Keras)
- Parsers (bs4, Selenium)
- SQL

Language

- English
- Ukrainian

About skills

I've been actively studying programming for three years, honing my skills in Python, machine learning (ML), deep learning (DL), and their popular libraries. Currently pursuing university studies, I'm eager to blend my academic pursuits with practical work experience.

In the realm of ML, I'm proficient in Pandas, Scikit-learn, NumPy, Matplotlib, and Seaborn. Delving into DL, I've gained foundational knowledge in TensorFlow and Keras.

Additionally, I'm adept at creating parsers using BeautifulSoup (bs4) and Selenium. My extensive familiarity with Python enables me to craft clean, structured code proficiently.

Experience

01.2024- still now

Data Analyst | Startup building a mobile application | Luxembourg (remote)

2023 - still now

I am actively studying neural networks and machine learning

08-09.2023

Project for forecasting prices for apartments - I had some experience in parsing

2021-2022

Ukrainian online school - Editor of lessons material for schoolchildren

About me

If we talk about me, I am responsible, punctual and attentive to details.

As a hobby, I dedicate my time to solving problems on the LeetCode platform.

In my free time I play the guitar, gym, table tennis and read books.
